■ Introduction

The EIP-2019 is an 8-ch remote analog input module. It supports not only voltage and current (internal resistors selectable) input type but also thermocouple type with B,C,E,J,K,N,R,S,T. There is an automatically cold-junction compensation (CJC) for each channel. The accuracy of the measurement is smaller than 0.1% FSR. The Module is designed as an EtherNet/IP adapter. Users can obtain the input status as well as the connection status of the EIP-2019 by the LEDs indication. In addition, ICPDAS provides software utility to easily configure and test the EIP-2000 modules via Ethernet.

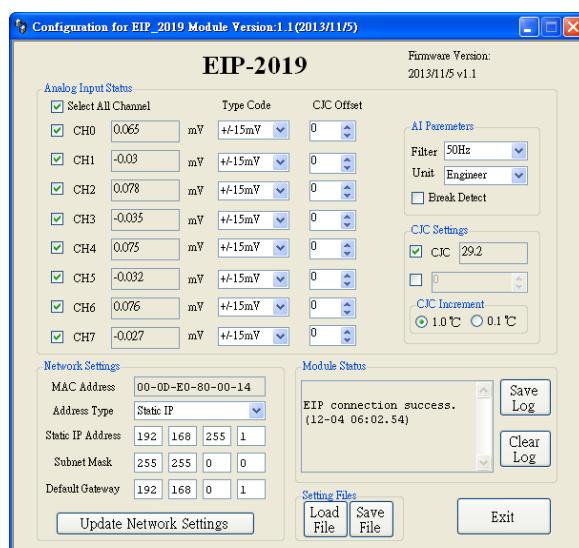

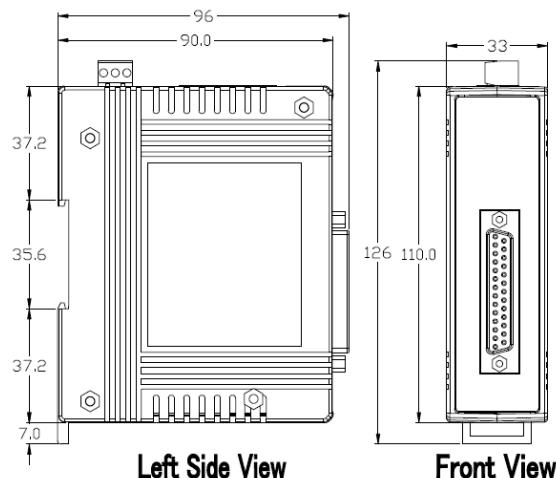

■ Utility Features

- Network parameters configuration
- AI parameters configuration
- CJC settings adjustment
- Functions configuration such as Type Code selection
- Easy test to transmit/receive the I/O status by EtherNet/IP
- Setting files management

■ Wire connection
